

FAST

FENTANYL

FACTS

Stanford
MEDICINE

REACH Lab

Fentanyl effects can include:
dizziness and **drowsiness**,
vomiting and **nausea**, **euphoria**,
pain relief, and **respiratory failure**

There are 2 types of fentanyl:
pharmaceutical and illegally
made fentanyl. **Most
overdoses are due to illegally
made fentanyl**

Carry **Narcan** to stop
overdoses of those
around you

Fentanyl can be sold in a
pill, powder form, or as an
injectable; **you can't see,
smell or taste it**

Use test strips to **test
drugs** to see if they are
laced with fentanyl

PENNY

GRAIN
OF RICE

LETHAL DOSE
OF FENTANYL

A **lethal dose** of
fentanyl is
equivalent to **less
than a grain of rice**

Treatment is available.

Here is a resource to find a
treatment center:
